ISUZU

REMAN

Cost Effective. High Quality. No Short Cuts.

WHAT IS ISUZU REMAN?

Isuzu Reman is an available engine replacement solution with shorter lead times while maintaining a high level of quality and end user satisfaction.

Many people think rebuilt is the same as remanufactured. But there are significant differences! Isuzu Reman engines use Genuine Isuzu Parts and are designed, remanufactured, and tested to meet strict Isuzu specifications. The same concern for quality that goes into the manufacturing of new Isuzu engines is applied.

WHY CHOOSE ISUZU REMAN?

Isuzu Reman is a quick and affordable alternative to a new replacement or rebuilt engine. We have a high content of new components. When you see the Isuzu Reman logo, you can be assured of the Isuzu guarantee!

Before

After

THE ISUZU REMAN PROCESS

Core returns are direct from the Isuzu network to the remanufacturing location, where they are thoroughly inspected, cleaned, and undergo quality checks throughout the production process.

1. Core inspection, cleaned
2. Thorough inspection of individual components

3. Non-reusable parts discarded and replaced with new Genuine Isuzu Parts.

For additional information, please contact your local distributor or visit isuzuengines.com

4. Cleaned, reinspected

5. Engine installed on Dynamometer to test for output, oil pressure, oil/coolant leaks, etc.
